

THE TASMAN BIN SURROUND

An aesthetically pleasing enclosure for protecting and securing wheeled bins. Anchored at four points, and constructed of heavy duty steel, the Tasman wheeled bin surround is made to stand up to tough environments. A useful design feature is the non perforated rectangular section in the middle of each outer face. This 225mm x 175mm section allows for the addition of corporate or council logos. A cross piece in the mouth of the surround deters the disposal of household rubbish. A lockable side entry door allows access to the wheeled bin inside. The Tasman surrounds are available in a variety of powder coated colours.

Dimensions

Specifications
