

THE WHEELED BIN STANDS

An economical and effective method for securing wheeled bins, the stands come in a variety of formats. Single-sided or double-sided stand heads as well as the option of either in-ground or bolt-down installation give these stands the ability to be utilized in almost any application.

An improved side locking system now allows the user unrestricted access to the lock and key. The broad security flap is strong enough to prevent bending by hand and prevents the bin lid from opening wide enough to allow entry of household garbage bags. These stands are also available in a wall mounted format.

Dimensions

In-ground 120 & 240 litre stand height (Including in-ground portion)	1330mm
Bolt-down 120 litre stand height	925mm
Bolt-Down 240 litre stand height	1047mm

Specifications
